ACADEMIC OVERVIEW

In this everchanging world, new challenges are emerging day by day. Keeping this in mind and to make our young minds globally competitive and skillfully efficient, our school is going to implement new pedagogies as per new National Education Policy (NEP) of India. Airport School has come up with excellent programmes that curriculum can assist your child get better learning skills. The syllabus is planned meticulously to develop in the students a love for learning, while giving them the strong basic skills they will need, for a smooth transition into primary school.

We will make sure that your child is not only getting better in understanding but, slowly they are also being curious about several other aspects. Under this norm "No Homework, No Exam" Policy from Nursery to 2nd Std.

No Homework Policy :

Homework should never replace a teaching opportunity in the classroom . At Airport School, children have no homework until Grade 2. Homework for a tender child also limits valuable family time and can be detrimental as a mental stress.

By ensuring that they complete all assignments and projects in school, the no-homework policy enables "our learners to find balance between their academic development and personal growth by having ample time for enjoyable activities with family."

The Pre-primary School is a place where every child discovers his/her identity. The role of the teacher is that of the 'guide on the side'. Our passionate set of care givers and teachers are always polite and welcoming to make this a very comfortable environment for children. Our Pre-primary classrooms have been designed precisely to help every child get proper learning facilities with the infusion of a bit of fun and play. Children are taught in a way that enriches their minds, unlocks their true potential and provides them with the skills to flourish in today's world. The curriculum with no homework policy therefore aims to facilitate students in the process of their

self-realization and to attain a complete transformation to become robust pillars for a promising future.

We at, Airport school emphasize on conceptual understanding rather than rote learning. Also, we encourage creativity, critical thinking, logical decision-making and innovation.

It is always ensured that the content focuses on key concepts, ideas, applications, and problem solving.

The prime focus of the Airport School is on innovations in teaching-learning methodologies by devising student friendly and student centered paradigms.

Speaking skills as a tool for learning language:

Well developed communication skills are vital to a child's overall success.

Learning, for us, is an opportunity to use what we've learned, and, broaden our horizons and improve the best version of ourselves. Learning helps us to discover our hidden talents and overcome fear and obstacles. Learning is life and life is learning.

Speaking skill is considered to be the most important skill by language learners. ... Thus, we at Airport school encourage learners to use English not only in the classroom but also in their daily interaction. We also emphasize on Public speaking which is a great way of personal development; it improves student's communication skills and is helpful in building confidence at an early age.

At Airport School we highlight different ways to support language and literacy skills development in early childhood classroom.

- Capture children's interest before you read.
- Introduce vocabulary during a read-aloud.
- Share the see-show-say strategy with families.
- Highlight children's favourite books.
- Short Talks
- Show and Tell
- Video Dictionary

PARENT-STUDENT-TEACHER BOND

An affiliation among parents, teachers and students translates into a better relationship between students and teachers. Students can place their trust and faith on the teacher and have someone on whom they can depend in school. When a parent is involved, it creates a positive attitude in the child towards school. It also improves children's academic achievement, work habits, social skills and emotional well being.

Teachers and parents both equally play an important role in the life of a child. Together they lay the foundation stone of their future. A non-intimidating and friendly relationship with the teachers place the child in a position to communicate and approach them without any hesitation.

STEPPING BEYOND THE SCHOOL GATE

By leaving comfort zone behind, students are able to take a leap of faith into a new world. Rather than confining students to school campus, we let our children explore and adapt to new possibilities. The opportunities are endless. As part of our education system, we wish to prepare our learners to become globally responsible citizens.

This aspiration makes education a challenging process and takes it beyond imparting text book knowledge through:

- Educational and field trips
- Intra and Inter school competitions
- National and International events
- Orientation Programmes
